

MNPV4 Combiner

With MC4 or Tyco connectors

Some installations may benefit from a plug & play combiner. The MNPV4-MC4 & MNPV4-TYCO each have 4 fuse holders, 15 Amp fuses and bulkhead mount connectors already installed and wired. If a connectorized combiner is in the cards, don't settle for less, get the MNPV4 series pre-wired combiners.

- Aluminum rainproof Type 3R enclosure
- Internal plastic injection molded dead front covers
- Plug & play combiners also available in 2, 8, & 10 position configurations
- The 8 & 10 position combiners can be split into 2 sections of 4+4 or 5+5 with separate PV minus inputs and outputs
- Knock outs for MidNite's SPD (Lightning arrestor)
- ETL listed to UL1741 for use in the US and Canada
